

STRONG ENOUGH TO BEND TO NEEDS

Since our start some four decades ago, **AKER** has built its reputation on products that meet the demands of our toughest customers.

Those same customers also demanded we start taking it a bit easier ... on their widening base of end-users.

The **KDS/KDTS series** of tubs, tub showers and showers answers that call. Each model has more of the simple, user-friendly features and flexibility you asked for to meet the needs of a broader base of consumer lifestyles, ages and abilities. These intuitive extras – some standard, some optional – include:

- Low threshold shower bases for easier access in and out
- Improved anti-slip texturing on tub bottoms and shower floors
- Vertical and horizontal grab bars, in variety of modern colors, AND reinforced walls that allow for the installation of additional grab bars, if needed
- Integrated seats with a unique inward angle that provide greater comfort and added floor space
- Wider soap dishes and added shelf space to hold bottles of varied size

With these improvements, our **KDS/KDTS** products remain as strong and as durable as you've come to expect and even easier to install. Therefore, **AKER** hasn't gone soft on you, only on the people who use our tubs, tub showers and showers.
